NEXOE APPLICATIONS GmbH is prestigious German manufacturer of high quality software solutions for instrumentation, control and automation (ICA) equipment as well as energy and process engineering. The focus is particularly on the graphical visualization of hardware close to reality and managing of big data streams as well as intuitive programming of applications for high-tech systems.

Due to continued expansion we are looking to recruit an experienced Delphi Developer with ability to program well with C#.

SENIOR DELPHI/C# DEVELOPER (M/F)
Bavaria, Regensburg

// JOB DESCRIPTION

Together with our software specialists you develop complex Delphi/C# components and applications and provide support for already closed software projects. The effort of documentation work is moderate and well balanced. Depending on your professional experience and qualifications you claim responsibility for independent ambitious projects.

// TO BE CONSIDERED FOR THIS ROLE, YOU MUST HAVE / BE:

› Strong knowledge (at least 3 years' experience) in object-oriented programming (OOP)
  for Windows using DELPHI environment RAD tools.
› Extensive knowledge of C# using Visual Studio will be an advantage.
› Deep understanding of operating systems (both Unix and Windows),
  networks and performance issues.
› Self-motivated team player with ability to work to stringent deadlines.
  You must also be able to communicate in English or German.

This position will provide the right candidate with a good work/life balance (flexible working hours) and an excellent salary and social benefits package so if you have the above skill set, then please get in touch with for immediate consideration.
